

# \* People Pedal Power - Practical information \*

Which bikes work?

To produce energy by pedaling, each bike is mounted on a stand with a generator. To be mounted on the stands a few prescriptions have to be followed.

**Rear wheel axle**

The rear wheel axle has to stick out to be mounted on the generation stands. Bikes with rapid fastening system with a flat end do not work. In the pictures below a few examples.

**DOES WORK**

**DOES NOT WORK**

### **Wheel diameter**

Stand 1 works with 26 inch wheels

Stand 2 works with both 26 and 28 inch wheels

Stand 3 works with both 26 and 28 inch wheels

Stand 4 works with both 26 and 28 inch wheels

### **Bikes we can provide**

The bikes we can provide are 2 bikes with 26 inch wheels that fit on the stands. One is for adults and the other is for children (12-16).
